Curling Arrangements Completed for Season

W. T. Pitt, who has given good satisfaction as icemaker at the Curling Rink for the past four years, was again appointed caretaker at a meeting of the executive of the Curling Club held Monday evening. As soon as the weather permits he will commence making ice and it will not be long before the brooms will be guiding the rocks towards the T head.

The season will open with a president vs. vice-president competition, the losers of which will provide a banquet for the winners.

It is expected that there will be an increased membership this year with 14 to 16 rinks being chosen. The ladies will also organize a schedule this year.

Remembrance Day Service.

The Remembrance Day Service which was held at the Evangelical Church on Sunday was very well attended. The church was decorated for the occasion with Dominion flags and the Union Jack. The service was very impressive.

The members of the Canadian Legion met in force and paraded to the church in a body.

Rev. A. S. Caughell delivered an appropriate sermon and Rev. J. R. Geeson of the United Church offered the commemoration prayer and read the Scripture. Dr. H. C. Liesemer sounded the Last Post and Reveille and the anthem "He Maketh War to Cease," was fittingly rendered by the Junior Choir.

Mountain View Council.

The term for Councillors has been extended from two to three years by an amendment to the Municipal Act passed at the last regular session of the Alberta legislature, it was pointed out at a meeting of the Mountain View municipal council held at Olds last Saturday.

A letter was read from the Department stating that it was necessary to elect only two councillors each year in future and suggesting that elections in 1937 be held in Divisions 1 and 2 and that the councillor in Division 3 carry on for another year. In 1938 the councillors in Divisions 4 and 5 will carry over. A motion was passed by the council adopting these suggestions.

Reeve Saunders and Councillor Flinn were appointed delegates to attend the convention of Alberta municipalities to be held next week in Calgary.

One application under the Farmers' Credit Arrangement Act was reported, one application approved for mother's allowance, and six applications for tax consolidation allowed.

Considerable time was taken up with matters of relief, and bills and pay sheets were passed for payment.

A Splendid Concert.

The annual Armistice Day concert given by the Canadian Legion on Wednesday, was a musical treat and thoroughly appreciated by a capacity audience.

The concert was opened by the Didsbury School Orchestra with four selections, and their performance was a real credit to their conductor, Mr. C. R. Ford.

The other artistes on the program, Betty Taylor who had a delightful soprano voice; Jean Gilbert, talented exponent of both piano and violin, and Gilbert Patrick, baritone, who sang songs of the lighter vein, fully sustained their reputation of being among Calgary's leading musical artistes. They were ably accompanied by Helen Boese, who arranged the program.

Barbara Brown who is no stranger to local audiences, added color to the program with her clever dancing.

Knox United Church Notes.

The services next Sunday will be in charge of the pastor and he will resume the series of addresses on "The Sermon on the Mount." A cordial invitation is extended to all.

The Young People's Society held their organization meeting last Monday and will meet next Monday at 8 p.m. in the Church Parlor. The meeting will be in charge of the Citizenship Committee, the topic being "World Peace." Young people of 18 to 30 are heartily invited.

The Bible Study Class will be held Tuesday evening next at 8 o'clock in the Church Parlor. A full attendance is urged.

Tuesday afternoon, November 17, a presbyterial meeting of the W. M. S. will be held in the church at 2 o'clock. The guest speaker will be Miss Isabel Griffiths, of Toronto. All ladies of the congregation are invited. Visitors from Crossfield, Carstairs and Olds will be present. In the evening at 7:30 Miss Griffiths will address a C. G. I. T. rally, when the Olds and Carstairs girls will be the guests of the Didsbury girls.

Hunters Return With Good Bags.

A number of hunters have returned from the woods and all report good success. While they say that there are more hunters out this year, the game seems to be fairly plentiful.

George and Donald Hardy, who had been hunting near the Red Deer river, were first to report, having bagged a moose on Tuesday morning, the second day out.

Charlie Mortimer, who spent a couple days in the Nordegg district, came out with a deer.

The biggest haul reported so far was made by a party comprising of Frank Hesselton, Bert Fisher, Jack Rindal, Jack Topley and Otto Mueller who hunted the upper reaches of the Red Deer, and came in Sunday with three moose and five deer to their credit.

Jack McCloy, Cecil Adshead, Alf Studer and George Murray had very good hunting and sustained their reputation by bringing in, on Tuesday, 4 deer and a moose.

Word has been heard of the Stewart Tighe party, who are hunting in the Clearwater country, who report they have each bagged a moose. They will not be in however until this week end.

Judge Orders Reliefs to Return

Thirty five cases of borderline relief cases were brought before Judge McNeil on Thursday by the City of Calgary to decide to responsibility. Eighteen cases were ordered as not being Calgary responsibility, six were definitely established as Calgary charges and others were adjourned or withdrawn.

The judge ordered several cases to be returned to the municipal districts which were responsible and remarked Calgary had evidently been "too easy" in its handling of unemployed persons of doubtful residence qualifications.

Messrs. A. Brusso and A. McNaughton represented the local municipalities at the hearing.

In Remembrance.

Led by the Didsbury Boys' Band the Canadian Legion paraded to the Memorial on Wednesday morning to observe the time-honored Remembrance Day rites in honor of their departed comrades.

Mr. W. A. Austin, president of the local branch, laid wreaths on behalf of the Legion and the provincial government, and Mrs. J. A. McGhee laid a wreath on behalf of the I.O.D.E.

A number of other wreaths were laid by the public.

Wanted By Police, Captured at Didsbury

Captured after a wild chase thru' the town early last Thursday morning, Carl Miller of Calgary, who was wanted by the police in connection with the illegal entry into the Noble Candy Co.'s premises in Calgary, was arrested by Constable Dunlop.

He was taken into custody in a back lane after a chase around the town by Constables Dunlop and Jensen and Constable Kercher.

He was traced during the night to a room in the Rosebud Hotel by Constable Dunlop, who found the door locked when he went to apprehend Miller. The police officer demanded admittance and was refused, and finally had to kick the door in. On entering the room, it was learned that Miller had left the room by way of a window and was going down a fire escape rope.

Miller was chased by the police and he was arrested in a lane after he had returned to the hotel to recover his clothes. He was taken to Calgary to face charges.

An Olds man named Pokitello, who was with him at the time, was arrested and charged with obstructing a police officer. He was sentenced at Olds the following day to three months hard labor.

LONDON, Monday—The judicial committee of the privy council today reserved decision in an appeal brought by the attorney-general of Canada to determine the validity of the Employment and Social Insurance Act.

Westerdale M.D. Will Hold Tax Sale

It was decided to hold a tax sale of lands in arrears for taxes, at the meeting of the Westerdale municipal council held Saturday afternoon. The sale will be held as soon as the necessary arrangements can be made.

Councillors Brown and Hogg were appointed delegates to the convention of Alberta municipalities to be held November 18-19-20.

Two applications for old age pension were approved.

The secretary reported his attending court in Calgary to deal with relief cases in that city which are claimed to be the responsibility of Westerdale Municipality. It was decided to take care of persons on relief ordered to return to the municipality, and to provide work for the payment of such relief.

The question of shortage of accommodation at the Olds Hospital was discussed, and a committee was appointed to take the matter up with the Town of Olds and the Mountain View Municipality.

The remainder of the meeting was spent in discussing matters of relief and the passing of bills and pay sheets.

Basketball.

The Carstairs basketball girls chalked up their second victory over Didsbury with a 34-6 score on Thursday October 29.

The girls are in much better trim than formerly, and their shots and passes are much more accurate.

Didsbury was at a decided disadvantage as they are unaccustomed to playing inside, and the slippery floor and crowded sidelines proved a considerable mental hazard. Shupe was high scorer in the game.

Line-up—Carstairs: Blachly 3, Waterman 3, Donnelly 4, Laing 7, Shupe 12, R. Spalding 2, Gough, McFarlane, H. Spalding.

Didsbury: Burns 2, Barrett 4, Boorman, Gable, Shells, Caithness, Cunningham, Geeson, McGhee.

—Carstairs News

New Uses For Old Products

The agricultural depression which has contracted the farmers' pocket books in Western Canada almost to the vanishing point in the past five or six years may be attributed to two main causes—a drought cycle and an undisposible surplus stock of wheat of great proportions, the inheritance of the bountiful harvest of 1928, followed by a fair average crop the succeeding year.

The drought was a visitation of Nature itself, over which mankind could have little or no control, and if this had been the sole cause of an attenuated agricultural bank account the effects of the depression would not have been nearly so severe in Western Canada as they have been, for during the era of gloom the drought area shifted its local somewhat each year though, it is also true, that there are some areas which have sustained the full impact for the entire period.

Over the entire depression period, however, many areas which have experienced drought have reaped some harvests, varying widely in degree, and had good prices for wheat prevailed, many farmers over large tracts would have reaped sufficient returns to carry them through without aid or with comparatively little assistance.

Unfortunately however, this was not the case and the average comparatively low price of farm products and particularly wheat, at times far below the cost of production, was as much a factor in creating conditions which have necessitated debt adjustment on a wide scale as was the lack of moisture and its resultant duststorms and scourge of insect pests.

Dry periods undoubtedly will come again and little can be done to circumvent their ill effects in loss of production and yields beyond perhaps a small measure of conservation, but the lesson of the six year period will have been lost unless some consideration is given to the necessity and wisdom of devising some measures to obviate, or at least reduce, the hazards of a repetition of prices below the cost of production.

There are several directions in which concentration on this problem might well be directed, apart from the erstwhile popular proposal to curtail production. There is the matter, for instance, of efforts to create consumer demand in existing markets for improved and more tasty products of the grain fields, to which reference has previously been made in these columns, and serious consideration might well be given to the possibilities of converting products of the field to industrial uses in the domestic market.

Henry Ford demonstrated that much might be done to make agricultural products available to industry when his experiments revealed that by-products of the soy bean make excellent material for construction of certain automobile parts and accessories, and along similar lines, experimentation in the conversion of grains into alcohol for industrial use and on a commercially feasible basis should be pushed with vigor in the laboratories.

So far the conversion of grain into industrial alcohol has not proved a commercial success, but a fractional advance in the price of gasoline or a reduction of a few cents in the cost of production of alcohol from such source would place it in the field of a competitive fuel with gasoline, a commodity which is used in large quantities by the farmers themselves as well as other consumers in Western Canada.

That greater use of alcohol as a fuel is inevitable in the not far distant future is the conclusion of the "Pennsylvania Farmer" which, in a recent issue had the following to say on the subject:

"The farmer has a double interest in liquid fuels. He is now a leading consumer; he may some day be an important producer. Alcohol made from farm crops can be mixed with gasoline to make a fuel which will run a combustion engine. Since the supply of petroleum cannot last forever a wider use of alcohol as a fuel is inevitable. It is being hastened by a score of foreign countries by legislation requiring, by taxation or otherwise, a mixture of alcohol with gasoline.

"Without such government intervention the blending does not occur, because gallon for gallon, gasoline is cheaper and better than alcohol. Under present conditions the effect of this legislation is to subsidize the producer of alcohol at the expense of the consumer of fuel. When producer and consumer is the same fellow it is doubtful if he wants this subsidy.

"In our country the farmer consumes a fourth of the gasoline used. If the price were raised four or five cents a gallon, the extra cost would cut the profits from corn, sugar cane, potatoes, etc., that went into alcohol, while the farmer who grew no alcohol-producing crops would be dealt with unfairly.

"Until gasoline prices advance materially it would appear that hopes for a wider use of alcohol as fuel lie in research rather than in legislation. When alcohol can be made cheaper or better than gasoline, no law will be needed to promote its use, and until then any such law is of questionable value to farmers."

English walnuts cannot be grown to maturity in England, due to the short growing season.

Locusts are trapped in ditches in Argentina, dried and ground into powder for fertilizer.

Extracting Precious Metals

A New Science In The Mining World
To Assist Operators

"Mineralography," a new science in the mining world designed to assist mining operators in their work of extracting precious metals, was described and demonstrated to delegates of the British Columbia division of the Canadian Institute of Mining and Metallurgy meeting at Vancouver.

In a darkened room pictures of hiding places of particles of gold among base minerals were shown, magnified many times, while Dr. M. H. Haycock, of the Dominion department of mines, and Dr. H. V. Warren, of the University of British Columbia, stood in the background and described the new science.

Specially constructed instruments were used to polish ore specimens to the finest surface possible and these are magnified many times by powerful glasses for scientific study.

In this way, the two doctors said, the new science has already become of great assistance to the mining industry and promises to become still more valuable in determining the best treatment for gold extraction and mineral separation generally.

SELECTED RECIPES

ALMOND MERINGUE CAKE

- 1/2 cup butter
- 1 1/2 cups powdered sugar
- 4 eggs
- 1 1/2 cups flour
- 1/2 cup cornstarch
- 4 teaspoons Magic Baking Powder
- 1/2 cup milk
- 1 teaspoon almond extract
- 1/2 cup almonds blanched and shredded

Cream butter, add sugar gradually, beating all the time. Add the well beaten yolks, sift together three times flour, cornstarch and baking powder, add to butter mixture alternately with the milk. Add flavoring then the stiffly beaten whites of eggs. Turn into a buttered 9-inch square pan about two inches deep and cover with the almonds and sprinkle with powdered sugar. Bake in moderate oven (350 degrees F.) 30 minutes. Just as soon as the meringue on cake begins to turn color cover with thick brown paper, as when finished baking the meringue should be a very delicate brown.

Claims World Undernourished

Australian Specialist Thinks More
Protective Foods Should Be
Produced

The world is undernourished, F. L. McDougall, Australian agricultural specialist, said in a report to the biennial general assembly of the International Institute of Agriculture at Rome.

Many world agricultural problems would be solved, he said, if certain nations would increase their production of "protective foods" instead of concentrating on high wheat yields.

"Satisfactory human diet must contain sufficient quantities of the kinds of food that provide these hitherto obscure elements in nutrition," the Australian said, explaining "the foods particularly valuable in this respect are milk, cheese, butter, fresh fruit and vegetables, eggs, fish and meat."

Coronation Oath

May Be Slightly Changed To Comply
With Statute Of Westminster

When the king takes the coronation oath at Westminster Abbey next May 12 he may use a form of words different from that of his predecessors.

It was made known the oath has been slightly altered in order to comply with the provisions of the statute of Westminster, which changed the status of the dominions.

The new wording, evolved after consultation between ecclesiastical and constitutional authorities, will not be revealed until the full program for the coronation is issued. It is understood the coronation service will be shorter than at the coronation of King George V. because of the absence of a queen consort.

Well Protected

Spain's \$700,000,000 gold reserve lies in practically impregnable vaults seven stories below the Bank of Spain building in Madrid, enclosed with seven-foot-thick armored steel and concrete.

Playing Chess By Letter

Principals In Minnesota And South
Africa Engaged In Slow Game

The world's slowest chess game is in progress in Blue Earth, Minnesota. One player is in Blue Earth and the other in South Africa. The players indicate their moves by letters to each other. As it takes 30 days for a letter to travel from one player to the other, the game is likely to continue for another five years. The principals in the match are John Brooks, president of the Johannesburg Chess Club, and Don Fitch, of Blue Earth. "It is a very thrilling game," Fitch declares. "Sometimes I sit up half the night deciding on the next play after I hear from Brooks. He's a pretty tough opponent, but he can't beat me before 1940 anyhow."

Television In Britain

Nothing Can Be Televised More Than
1,000 Yards From Transmit-
ting Station

Although British television has now reached the point of efficiency whereby daily programs are broadcast from Alexandra palace, the day apparently still is distant when a citizen will be able to enjoy a sport event from the depths of an arm chair.

At the present stage of development nothing can be televised more than 1,000 yards from the transmitting apparatus at Alexandra.

The owners' sets recently showed Archie Compton, British golf pro, giving a lesson to a pupil on a miniature course at Alexandra and easily followed the flight of the ball.

Fall Wheat Sown

At Spring Coulee in Southern Alberta considerable fall wheat and rye has been sown in the hope of getting crops next year. Rains have revived the grass on the Blood reserve and some hay has been cut from irrigated lands. Grain yields in the district were ten bushels for wheat and twenty for oats.

In The Cause Of Peace

Delegate Says There Is A Momen-
tum Behind The Peace
Movement

Mrs. John Grieve, League of Nations Society delegate to the recent peace conference at Brussels, following her return to Toronto, said that the prevailing mood of the conference was "neither optimism nor dismay, but one of determination."

People in Europe, she said, appeared to believe war was inevitable but that the danger was not immediate.

"The idea of the congress was to bring together on a limited platform as many people as possible, to establish a central bureau in each country to effect this platform, and an international bureau to co-ordinate the work in all countries," she said.

"There is a tremendous momentum behind the peace movement if it can only be harnessed. It will not be known how successful the congress was till we see how seriously the delegates set to work when they return."

Yugoslavia's Boy King

Brief English Schooling Has Left
Trace On His Character

What has particularly pleased the boy King Peter II. of Yugoslavia is the fact that he was able to spend his birthday with English relations. The Duke of Kent is his hero and the Duchess is favorite aunt. Although King Peter is not likely to continue his English schooling, the brief time he spent in England two years ago has left a definite trace on his character, says the Daily Sketch. His grandmother, Queen Marie of Rumania, favors this and does all she can to stimulate his English interests. He already speaks excellent English.

Film drama in the home, via television, may be given the true big theatre touch. It would require a tall member of the household, to sit squarely between one and the screen.

GROUND GRIP TIRES
take you through

Ground Grips are the greatest tires ever built for traction. The patented self-cleaning, super-traction tread makes its own road through mud, snow, sand and gravel. Thousands of doctors, salesmen, farmers and truck operators who travel over all kinds of roads in all types of weather enthusiastically report Ground Grip tires their greatest driving aid.

Ground Grip tires cost no more than standard types of tires. Have your local Firestone Dealer equip your car or truck NOW.

Ancient Rock Carvings On Vancouver Island Are Puzzle To Archaeologists

Mystery shrouding the origin of two ancient petroglyphs 15 miles west of Victoria, B.C., still continues to baffle archaeologists. One is in the form of a whale, the other resembles some strange monster of the deep, not unlike descriptions given of Amy Cadborosaurus, the sportive sea serpent so often "seen" around the end of Vancouver Island. Large numbers of yachtsmen visited the strange carvings this year; just because of rough water and poor anchorage, few got close enough to examine them thoroughly.

The petroglyphs are located at the northern extremity of Becher bay, named by Capt. Henry Kellett, R.N., of H.M.S. Herald, when surveying the coast in 1846. Indians long ago named the bay Chuchwaetsin, literally meaning "calm water."

Wolf, Lamb and Cub Islands in Becher Bay carry many traces of a large Indian population in the vicinity long before Spaniards first landed on Vancouver Island at Nootka. Above the beach are eight strokes on a protected concave surface of rock, done in some red substance resembling Indian dye. They are six inches long and half an inch apart. Natives believe them to be extremely ancient. Secrets of many dyes that kept their brightness for centuries were lost long ago.

According to legends handed down to present-day Indians, their forefathers always considered the petroglyphs a deep mystery. They were also puzzled by finding exquisitely made arrow heads of a variety of stone not native to Vancouver Island. The whole vicinity is dotted with square blocks of basaltic rock with pitted surfaces giving it the appearance of one having boiled in some vast volcanic upheaval.

On a bold-faced bluff of black rock there is a weathered representation of a whale six feet long, and two and one-half feet wide at the middle. Close examination shows its outline at one time had been carved deeply into the rock, but sea, wind and wave wore away the surface until nothing but a faint trace was left. Before being able to photograph the whale it was necessary to reinforce the lines carefully with white chalk.

Experts who have visited the carvings are unanimous in their opinion that they are undoubtedly centuries old, after calculating the length of time necessary to wear down the hard rock. What happened to the race believed to have left similar carvings at a few other spots on Vancouver Island will perhaps remain a mystery forever.

Visitors from famous museums who viewed the Mitchell and Hepburn stones unearthed many feet underground on the island, are sure the ancient craftsmen who fashioned them also chiselled out the Becher bay petroglyphs. The two stones are well executed human faces showing a distinctly Asiatic cast.

Two faint diagonal lines evenly spaced are carved across the middle of the whale. A deep S-shaped gash shows chisel marks in the middle portion. From the hardness of the rock it seems impossible the carving was made with stone implements, and it is a well known fact the Island Indians used no metal before the coming of Quadra, Vancouver and Cook. The whale has no sign of an eye.

Three hundred feet from the whale on a huge round boulder is a strange carving that reminds one of a sea serpent. It is 12 feet long from nose to tip of its tail. The monster has four bands around its neck, a pendant jaw with large teeth, a large eye and two strange protruberances upon its head.

Indians encountered by Capt. George Vancouver in 1792 had a weird legend about Iakim, a sea monster believed to have existed long before their forefathers. The carving may be some ancient artisan's idea of Iakim. Both the whale and the serpent are protected by a Historic Objects Preservation Act brass plate.

Igloo, constant companion of Admiral Byrd, was the only dog that ever travelled to both of the earth's poles.

Weed Seed Collections

Hints For Laboratory Workers And Others Interested In This Study

Students of agriculture and botany, laboratory workers, and others who make collections of weed seeds in the course of their work or studies have been busy making preparations at this time when plants are mature and the seeds ripe. However, the interest in this work extends to many individuals who make a hobby of weed seed collections, and for those who are not at the moment in close touch with the latest developments in the art, B. F. Forward of the Calgary Seed Laboratory, Dominion Department of Agriculture, offers a few interesting hints.

Small cotton sacks or paper sacks may be used to collect the seed in the field. Seed may be pulled directly from the plant or the entire plant may be collected to avoid any loss of seed. When plants are procured, they should be allowed to dry thoroughly so as to make threshing as easy as possible.

To thresh the seed, place the plant in a factory cotton sack. Flay with a round stick on a hard surface, preferably bricks, to remove the hulls. Thin hulls on seeds like Wild Oats are best removed by rubbing between the hands. Seeds of the Compositae like Dandelion do not require threshing. Hand seed sieves or the small clipper machines are very satisfactory for removing hulls and chaff after the seed has been flayed. The size of the mesh will depend on the size of the seed.

For collections, seed should be placed in small bottles or vials four drams in size. Label each vial with the common and the scientific name. For mountings, specially prepared boxes with brass clasps may be obtained. However, a homemade box could be made very simply. Secure a thick cardboard box. Space vials in box half inch apart. Rows of vials may be one inch apart. The vials are fastened to the box with thread or strips of adhesive paper. Arrange the vials in collection according to families.

Liked Chinese Dish

Present King Once Complimented Cook On Chop Suey

Working as a rush-hour cook in a downtown Toronto restaurant, where meals start at 25 cents, is a Chinese chef whose chop suey King Edward, then Prince of Wales, pronounced "lovely, wonderful."

"Prince like my chop suey so well he ask Lady Lougheed to call me into conservatory—very magnificent place, all beautiful flowers and goldfish—and say: 'Chin, that was a wonderful dish. Please have it next time I come.'"

"He not act like prince at all. He talk quick, he act quick, but he talk to everyone, just like plain man," was Chin Ping Yen's description of King Edward, whose dinner he prepared when the then Prince of Wales was luncheon guest at the home of Sir James and Lady Lougheed of Calgary in 1922.

Lady Lougheed had asked him not to serve turkey or some item of food which was placed before the prince everywhere he went.

"Her ladyship tell me to serve something different, so I make chop suey of chicken and mushroom sliced very fine. I make it to suit my own fancy, with maybe 20 different Chinese stuff. I can't remember now all I put in but prince like it much," said Chin Ping Yen, who said he was 38 "counted Chinese", but 37 according to English reckoning.

Would Draw Heavy Fine

Boys and girls under 18 have been forbidden to smoke in restaurants, cafes, parks, streets and other public places in Mecklenburg, Germany. The police decree ordering the ban declares that offenders are liable to be sent to prison for two weeks or fined \$62.50.

One of the longest canals in the world runs from Leningrad to the frontier of China, a distance of 4,500 miles.

Railways Increase Business

Gratifying Increase In Passenger Traffic Is Seen

The importance of the sleeping and dining car services of the railways of today was the subject of an address by A. A. Gardiner, assistant general traffic manager of the Canadian National Railways, delivered before the annual convention of the American Association of Superintendents of Dining Cars at Toronto.

The speaker stressed the fact that with the gratifying increase in passenger traffic the problem of numerous travellers who were not accustomed to train travel had assumed an entirely new significance and that it lay within the power of the sleeping and dining car staffs either to promote or discourage this new type of business.

Drawing attention to the fact that recent passenger fare legislation, both in Canada and the United States, had not only popularized rail travel but had emphasized the superiority of the accommodation offered, Mr. Gardiner intimated that the railway's campaign to make travellers "train-conscious" was increasingly successful and that he was proud to say the train crew were putting forth every effort to assist the passenger departments retain the new traffic secured.

A Modern World Pestilence

Death Toll On Highways Not Receiving Much Attention

The plagues and pestilences that harried the world's population in other centuries have disappeared before the advance of medical science and sanitation. Unfortunately in the first third of this century their places have been taken by a new form of mortality—death on the highway.

There is even less reason for this than there was for the old diseases which once decimated cities. When nations were faced with typhoid fever and diphtheria scourges, scientists and municipal authorities joined hands to drive them out and so determined was the campaign that today the number of cases and deaths from either cause is negligible.

Why cannot the same forces, aided by public opinion, put an end to the terrible death toll from automobile accidents?—Toronto Telegram.

Man's Word Is Good

Paddy Carver, whose worldly goods were destroyed in the foundering of the freighter Avon River in Hudson Bay, doesn't contemplate any difficulty in reaching an insurance settlement. "In the southern part of Ireland a man's word is always taken," said Paddy when commenting on a £10 claim he intends to register. "To doubt it would be the highest insult."

The two outermost moons of the planet Jupiter do not move around it from east to west, as do its other moons, but from north to south, and south to north.

Indian Lore That Created A Name For The Key Province Of Canadian West

A Stubborn Enemy

Work And Patience Required To Get Rid Of Mustard

Owing to the great vitality of the seed, mustard is a very hard weed to eradicate. The seeds, once in the ground, live for years. Hence it takes patience, a great deal of labor, and a long time to get rid of the weed when it once gets possession of the land. When present only in small amounts, hand-pulling is the best method, providing the pulling is done before seeds have formed and as persons pulling in a hurry cannot wait to examine for seed, it is best to put the weeds, as they are pulled, in bundles where they can be burned when dry.

Iron sulphate or copperas can be successfully used to destroy mustard in standing grain without injury to the crop. A 20 per cent. solution should be applied. This can be prepared by dissolving eighty pounds of iron sulphate in 40 gallons of water. Iron sulphate is dissolved quite readily in cold water. The solution should be strained through a cheese cloth, as it is put into the spray pump tank. This will remove dirt and small particles that are apt to clog the nozzles.

Apply on a calm, clear day, just as soon as the first few plants in the fields show flowers. It is very important to spray early. If the plants are left too long the treatment is not nearly as effective. If a heavy rain comes within twenty-four hours after the solution is applied, it will be necessary to spray again. An ordinary hand pump barrel sprayer, such as is employed to spray fruit trees, may be used, or a potato sprayer can be rigged up to do the work. Many of the up-to-date sprayers have a special broadcast attachment for spraying weeds. These are excellent for large areas, as they cover a wide strip at each round. Care must be taken to see that every mustard plant is covered with the solution in the form of a fine spray.

Phrenologist Picks Good Cooks

Phrenology was used to select chefs for a boarding house near Sydney, Australia. The proprietress called in a phrenologist to read the "bump of cooking" of 50 applicants and report on their character. The scientist selected two and the proprietress declares the selections have proved most satisfactory and the method is the only one to use in choosing help.

Encased in a block of ice 40 prize dahlias from the National Dahlia Society show will be shipped from London to Newcastle, Australia, for display next March.

Waters still ebb and flow in the straits off Manitoba Island, 15 miles north of The Narrows. Lake Manitoba's sacred temple of Indian tradition is now a quiet rural community but when black shadows fall in the forests the island again becomes the haunt of Manitou.

The march of civilization has not removed it from the place of Indian mythology that created a name for the key province of the western prairies. Virgin woodlands and streams that border the lake have changed little since Pierre Gaultier de Varennes, Sieur de la Verandrye and his son first glimpsed them 146 years ago.

Indian tribes crossed the half-mile strip of water at this point centuries ago to make raids on more peaceful bands. Here, also, they met to smoke the pipe of peace and pay tribute to the Great Spirit. Tribes of Crees, Ojibways and Saulteaux believed their Manitou lived on the island to the north.

They called the place Manitowapah—a contraction of Manitou, from the island-dwelling place of their spirit, and Wapah, meaning Narrows (the spirit of the Narrows). Because of conflicting sound the white man, according to early authorities, curtailed it to Manitoba.

History of the name dates back centuries when only the Red Man roamed the lake shores. It was believed a weird sound caused by the rapid current passing over the shingly, limestone rocks on the shore of the island was the voice of the Great Spirit.

When the south wind blows waters in the Narrows rise more than four feet. The receding tide makes a rushing noise which can be heard for long distances. The district came to be a sacred place for various tribes who gathered there for ancient ceremonies, war dances and feasts.

Present-day Indians have already embraced the Christian faith but pagan beliefs and superstitions die hard. Older natives have been seen to throw pieces of tobacco into the water while passing the island as an offering to the Great Spirit.

An example of the extent to which superstition clings is furnished by Hebron Moor, pioneer postmaster of The Narrows' community. When a Hudson's Bay steamer travelling down the northern shore of the lake was becalmed at the entrance to the straits, Alexis, old Indian member of the crew, was asked to appeal to Manitou for a fair wind.

The native did so in a dramatic manner. Mr. Moor relates, throwing the usual offering on the waters. Immediately the surface rippled. A faint puff of wind became a steady breeze that filled the sails and carried the vessel on to its destination.

Trade With Britain

British Empire Is Best Customer Of United States

Evidence the British Empire is still the best customer of the United States was presented by the U.S. chamber of commerce in an analysis of foreign trade for the first half of this year.

The empire absorbed 41 per cent. of all American exports during that period, and at the same time supplied 35 per cent. of all foreign goods shipped into the United States.

The United Kingdom bought \$187,872,000 worth of goods from American producers, lifting its purchases 17 per cent. above the comparable period last year.

Canada was the second heaviest buyer, taking 15 per cent. more than in 1935. Its purchases totalled \$182,773,000.

Carrier Pigeon Saved Lives

A carrier pigeon at Fukuoka, Japan, is credited with saving 130 lives. A small ship ran into a storm which threatened to sink it. Without wireless, it was unable to call for help until a passenger, Risaburo Ishibashi, released his pigeon with a request for aid.

The palm or coconut crab lives almost entirely on coconuts. The creature is a native of the East Indies.

An Exclusive Alice Brooks Design

Household Arts by Alice Brooks

Quickly Crocheted Squares Make a Handsome Rug

PATTERN 5699

Just a simple square, repeated and joined together forms this smart rug. You'll love doing the colorful squares in varied colors, and, in no time at all, you'll have enough completed to make this stunning rug. Here's one way to turn useless rags into something worthwhile, though rug wool or candlewicking may also be used. Done in Germantown the squares would make a handsome cushion or chair set. In pattern 5699 you will find complete instructions and charts for making the square shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat.

By H. G. L. STRANGE

Director "Crop Testing Plan."

The 250 million bushels of wheat which Canada hopes to export annually, has to compete on the markets of the world with a vast quantity of other foodstuffs.

It is estimated that the 2,000 million people in the world consume each year in round numbers foodstuffs as follows: Potatoes 8,000 million bushels, wheat 5,600 million, rice 5,300 million, rye, millet and spelt together 1,930 million.

In addition 10,500 million bushels of corn, barley, oats and mixed grains are fed to livestock and produce the equivalent of about 2,000 million bushels of livestock produce such as meat, eggs, butter, cheese, milk and cream.

Then there are consumed either directly or through livestock large amounts of beans, peas, lentils, rapeseed, ground nuts, linseed, sesame, cotton seed, hemp seed, copra, palm kernels, fish, game, vegetables, fruit and pasture grasses.

Or, it means that on the average each person in the world consumes annually the following: Potatoes 4 bushels, wheat 2.8 bushels, rice 2.6 bushels, rye, millet and spelt 1 bushel, livestock products 1.1 bushels, fish, game and vegetables, fruit and other cereals 3 bushels, making a total of 14.5 bushels of foodstuffs each person consumes per annum, of which it will be noted that wheat forms one-fifth.

Factors that have tended to raise prices have been: Poor prospects in Australia, Italy purchasing Argentine wheat heavily, serious lack of sub-soil moisture in the U.S.A., Northwest and Western Canada, price of gold advancing, Japanese wheat crop estimates lower, increase in Argentine flax acreage, sale of diamonds from South Africa increasing considerably.

Prices have been pushed down by: Beneficial rains in Argentina, large wheat exports from Balkans, Southern Hemisphere, India, Persia and Sweden, U.S. winter wheat crop very promising, Argentina further devalues currency, seasonable crop weather in Europe, exports of corn and pork from Rhodesia increasing.

In Our Stars.

Curious mankind would love to penetrate the veil that divides the present from the future. Based on this human curiosity, soothsayers, astrologers, palmists and fortune-tellers to the number of many thousands manage to make a living.

Webster's dictionary defines astrology as "the pseudo-science which treats of the influence of the stars upon human affairs, and of foretelling terrestrial events by their positions and aspects."

A convention of American astrologists met in Chicago a few weeks ago. All the delegates were bursting with news of the future. Some of their predictions were:

Mr. Roosevelt would be elected.

The economic outlook for next year is good. There will be no drought, and boom conditions will prevail.

SOCIAL CREDIT NOTES

The Didsbury Social Credit Study Group No. 1 had the pleasure of receiving as their guests after the zone assembly meeting Thursday evening last, the constituency president Mr. H. L. Pryor and a number of delegates from outside points. A midnight lunch was enjoyed and opinions of mutual interest exchanged. The members wish to thank their host and hostess, Mr. and Mrs. Fred Hughes, for lending their home on this occasion.

The members of the above group held their regular meeting at the home of the president, Mr. and Mrs. A. Schwesinger. After the singing of the theme song, minutes were read and adopted and the treasurer's report received. Correspondence dealt with included letters from Premier Aberhart, R. E. Ansley, M.L.A., Mr. Wilmott and Mr. Young. Amendments to the constitution were approved of by the group and forwarded to the Albertan for publication. The proposed co-operative store again came under discussion and the matter turned over to the provisional trustees for further attention. The meeting appointed a new social committee of four. Five new members were registered. The meeting adjourned and will be in session again on Monday, November 23rd. Place of meeting will be announced later.

Mrs. A. Schwesinger, Sec.-Treas.

The Didsbury Pioneer S.C. Group held a well attended meeting at the home of Mrs. Margaret Cummings on Monday evening, November 9th. After approving of the minutes and the reading and discussing of correspondence, the president gave an outlined explanation of the new invention of Peter Ivanoff, "Comotional Motion," and George L. Body's "Dimensional Power." After explaining how this new power will revolutionize the world if developed, the president pointed out that it must be kept out of control of exploiting monopolists. The speaker then explained how the financiers and exploiting monopolists use new inventions to exploit nations and finally destroy life and property by war. He appealed to those present to steadfastly support a government and its leaders who aimed to develop and protect new discoveries and inventions and make them a benefit to the human race, instead of a curse to the race, as would be the case if exploiting monopolists gained control of them. The speaker drew attention to the new "United Front" Party and warned the people to beware of its leaders. The next meeting will be held at the home of the president, M. Weber, on Monday evening, November 16th, 8 o'clock. All are welcome.

H. Erb, Secretary.

New 1937 Ford V-8s Announced

Two of the most popular body types in the entire Ford V-8 line are the de luxe Fordor touring sedan (above) and the Tudor sedan (below). The new 1937 editions are shown. The smart new front end, new headlamps, V-type windshield and use of the "tear-

drop" form wherever practicable, combine to give what those who previewed it declare to be the most beautiful Ford yet produced. The Fordor touring sedan is a family car especially suitable for touring. It boasts a roomy built-in trunk. The Tudor sedan has a new full-

width front seat, with divided tilting seat back. Two engine sizes are available, the famous 85 horsepower V-8 engine and a new 60 horsepower V-8 engine. Mechanical improvements include new all-steel body, with steel top; "easy-action safety" brakes and new "finger-tip" steering.

Items of Interest

Direct relief recipients in this province reached a total of 58,297 during the month of October, according to a report issued by the provincial relief department. This was an increase of 2,784 over September.

Charged with having shot a female deer, Frank Smith of Turner Valley was fined \$10 and costs by Magistrate F. Ross at Black Diamond, according to a report received in Calgary this week. Mr. Smith said he shot the deer by accident.

Harry Humble, former Calgary Alderman and who came into prominence some time ago with his radio broadcast, is being searched for by the police on a charge which alleges the theft of \$4,813 from the City Hall Market, of which he was manager. He left Calgary two weeks ago and as he had not returned a warrant was sworn out.

Practically all of the rural telephone system available in this province has been sold to mutual telephone companies, according to a report which J. D. Baker, deputy minister, has submitted to Hon. W. A. Fallow minister of telephones. The report shows that 86.3 per cent of the rural system has been sold to 659 mutual companies. As 10 per cent of the remainder will be torn down in any event, this leaves little to be sold. There are 13,959 rural telephone subscribers

at present, an increase of 6,410 over the number before the sales were made. Book value of lines sold was \$6,143,244 while the net return from sales was \$257,157. Some 17,295 miles of pole line, which comprises 28,965 miles of aerial wire have been sold.

Arrangements are being made for Canadian participation in the big Paris exposition from May to November next year. More than 1,000 square feet of space has been applied for and exhibition will be arranged by J. O. Turcotte, Canadian exhibition commissioner in London.

Calgary led the province in liquor sales for the fiscal year ended March 31st, 1936, according to the public accounts issued by the provincial government Friday. The southern city had a gross total of \$1,121,809 in sales at its two liquor stores, the stores' net profit being \$308,047. At the two Edmonton stores, which put the capital in second place, gross sales amounted to \$1,047,613, while the net profit was \$270,865.

Premier Hepburn said that the Ontario government would "probably" try to take over the funds of the \$500,000 Charles Vance Miller estate and administer them for the benefit of baby-derby winning families. "We want to see the kids get a square deal and we certainly will not escheat the will to the Crown," he added.

Fully 453 Edmonton retail merchants have agreed to participate in the Alberta government's Social

"BUY IN DIDSBURY"

As a Life Insurance Policyholder You Share in the Ownership of These Valuable Assets

Government Bonds

First Mortgages

Industrial Securities

Municipal Bonds

Public Utility Bonds

YOUR savings in Life Insurance — which help to form the Assets of the company in which you are insured—not only protect you and your family but also make you a part owner of high-grade securities.

For example—as a Life Insurance policyholder, you share in the ownership of Government and Municipal bonds. These bonds provide for the construction of highways, railways, canals, schools, water and sewage systems, and other important public enterprises.

You likewise have a definite financial interest in Canadian industries, and in Canadian homes and farms.

The Life Insurance companies, which your enterprise and thrift have built up, acting on behalf of yourself and 3,500,000 other policyholders, invest the Assets

you have entrusted to them. In making these investments, they exercise the utmost care to secure safety with a satisfactory yield.

Of the combined Assets in the Life Insurance companies operating in Canada, the major part is invested in Government and Municipal bonds and debentures. Large amounts are also invested in first mortgages on carefully selected city, town and farm properties, and in loans to policyholders.

You can take satisfaction in the fact that Life Insurance companies in Canada have faithfully discharged their obligations. Even in periods of greatest financial stress, every obligation guaranteed by their policies has been fulfilled.

WORLD HAPPENINGS BRIEFLY TOLD

The king will hold a great review for ex-service men during the coronation period next spring.

Appointment of D. D. D. Murphy as assistant inspector of civil aviation at Carcross, Yukon territory, has been announced.

Simontown's coronation gift to the king will take the form of a King Edward coronation playing field area and recreation for the youth of that South African naval port.

Russia was now offering a possible market for upwards of 100,000 head of Canadian cattle a year, G. G. Serkau, Montreal trader, said in an interview at Calgary.

The monetary unit of the conquered Ethiopian kingdom — the Maria Teresa thaler — was established as the legal currency by cabinet decree, after having been abolished in a Rome edict last July.

Establishment of a training school where boys and girls might be taught a trade was advocated by speakers at a public hearing held by the royal commission investigating penal institutions in Canada.

Navigation of all kinds was closed for the season at Churchill, the Hudson Bay port on Oct. 13, following departure of 75 members of crews of harbor and coastal boats. All vessels have been taken out of the water onto the slipways.

Lady Emma Morrison, 60, and widow of Major-General Sir Edward Morrison, died at her home at Ottawa after a prolonged illness. Native of New Orleans, she was married to Sir Edward Morrison, of the Canadian artillery, in 1911.

Part Of National Life

Democracy Has Been Accepted In Britain For Two Centuries

It was fashionable a few years ago to speak of democracy as being "on trial". In many countries it is no longer on trial, but has been condemned and executed. In this country it is not, and never was (at any rate for the past couple of hundred years) on trial; it is part and parcel of our national life, and something which it behoves us to regard as no less permanent than Herr Hitler's "thousand-year regime." If anything is on trial it is rather dictatorship, for we have still to see what happens to it when the day comes to find the successors of the men whose personality had laid its stamp upon their creations. No country can depend on a perpetual supply of Hitlers and Mussolinis. In their default, will anybody care to say that dictatorship, relying as it does upon a very inflexible principle of personal leadership, is likely to prove any more stable than democracy? — London Morning Post.

Mistletoe was known to the Druids as "all-heal"; they regarded it as a cure for all diseases.

Industrial output is falling off in Chile.

MOTHERS FEEL SAFER

One Mother writes: "With a family of children constantly getting scratches, cuts, or bruises, I have proved Mecca an invaluable balm. I cannot praise it too highly. I keep a tin of Mecca upstairs and another downstairs."

"MECCA" OINTMENT

An Enthusiastic Veteran

Lord Baden-Powell Works Hard For Boy Scout Cause

The veteran in youth movements, Lord Baden-Powell, ably backed by Lady Baden-Powell, who is as keen on the Girl Guides as her husband is on the Boy Scouts, is indefatigable in his efforts for the cause. He went to Scotland to open the Aberdeen Scouts' new luxury camping ground at Templars' Park, Maryculter. With his encouragement, the boys have worked hard to make Maryculter House look very much as it did in the twelfth century, when it was inhabited by the Knights Templars who daily did their "good turns." The grey and red colors of the Knights Templars have been reproduced in the scheme, and the interior has been decorated so far as may be in true medieval style.

The Chief Scout is anxious, too, that all boys possible shall pass the necessary tests for the King's Scout Badge in time for the Coronation, because scouts are to sell the Coronation program prepared by King George's Jubilee Trust Fund.

Safety For Miners

Science Has Instruments To Detect Threatened Cave-In

Scientific ears, mechanical thermometers and giant stethoscopes will feel the pulse of mother earth in the future and give miners advance warning of impending cave-ins, J. V. Claypool, of Hibbing, Minn., told the National Safety Conference at Atlantic City, N.J.

Claypool, district superintendent of the Oliver Iron Mining Company, said detection of weak spots in the walls and props of mines were rapidly becoming an exact science.

He told of a new "dynamometer prop" that records the earth's pressure against the mine's pillars much in the same manner as a thermometer records temperature. The device is built into one of the ceiling supports, and the slightest increase in pressure from above is recorded by a rise of a mercury column.

Another device utilizes a steel bar, fitted telescopically into a cylinder and held in place by a stout coil spring. When set against mine ceilings, compression of the spring is registered by a stylus that traces a line on a drum.

Created Her Own Job

Clever Girl Now Does Buying For Busy Professional Men

A clever girl went about to offices in one city and asked busy professional men if she might bring goods to them in their offices so they could save time in making their selections of socks, ties, shirts, belts, handkerchiefs, etc. She secured all the facts about their needs, such as colors preferred and approximate price they wished to pay.

These men found this girl a good shopper; and with so little exertion they could get the brown tie they wanted to wear with their tan suit and the shirt that set it off. She showed them only articles in their own sizes, and she had even the correct shirt sleeve lengths when she brought the shirts for selection. The men found they saved money and much time by this method of shopping. — Christian Science Monitor.

Coming To Canada

Farmers From Czechoslovakia Will Settle Here Next Spring

In Winnipeg to study land settlement possibilities in Western Canada, Adolf Schmidt, secretary of the Central Farmers' Co-operative Association with headquarters in Prague, said 50 families will come to Canada next spring to settle on farms.

If good reports are sent back to Czechoslovakia, Mr. Schmidt said, other settlers will follow. The association has a membership of 10,000. The farmers who will come here next spring, he continued, will have a capital of from \$1,000 to \$5,000 per family.

Tea compressed into bricks in China, slabs of copper in Sweden, cattle, milk, salt and tobacco, all were used as coinage at one time or another in various lands.

Automobile horns having been outlawed in London, an electric bell signal has been invented to replace them.

COULD NOT LIFT ARMS ABOVE HEAD

Owing to Painful Rheumatism

This woman suffered from rheumatism in her back, arms and legs. For two months she endured this painful condition, then, like many another sufferer, she decided to try Kruschen Salts. Read her letter:—

"About fifteen months ago I had rheumatism in my arms, back and legs. The pains in my arms and legs after getting warm in bed were almost unbearable. I was like that for two months, and could not reach above my head. I read so much about Kruschen Salts that I thought I would try them. I am so glad to say that for more than a year I have not had the slightest return of my rheumatism."

(Mrs.) H.E. The pains and stiffness of rheumatism are frequently due to deposits of uric acid in the muscles and joints. Kruschen Salts assist in stimulating the internal organ to healthy, regular activity, and help them to get rid of this excess uric acid.

Week-End Drinkers

Chicago Medical Authority Points To Perils Of Chronic Tipplers

Liquor takes its heaviest toll on the "week-end drinkers"—those persons who vary periodic alcoholic spree with short rides on the "water wagon"—a Chicago medical authority declared at Kansas City.

That type of drinker, said Dr. Joseph A. Capps, professor of medicine at the University of Chicago, courts an eventual "mental breakdown" and suffers "loss of will power and confidence in himself during the process."

These terrors are not so prone to dog the chronic tippler, who instead invites cirrhosis of the liver as the price for his indulgence, said Dr. Capps.

"Our danger is that we're becoming a nation of hard liquor drinkers. Over a period of years this is going to mean a decline in the health and mental integrity of our country," he declared.

"If young people must drink, the sensible thing is to use mild drinks (beer and wines) and keep away from hard liquor."

However, drinking may play a legitimate part in the lives of persons beyond middle age, the doctor said.

"Work recently done by a Boston specialist goes to show that a small amount of spirits late in life tends to preserve the arteries."

Studied For Long Time

Flying Life Of Wright Brothers Started As Hobby

The Wright brothers began their historic flying life as a pleasant hobby, reading all the books on flying they could get their hands on to see what others had done and then to reckon what they themselves could do in it. They patiently checked data as to curved surfaces. They flew kites. Making doubly certain of every step, refusing to be hurried, they first spent years in theoretical planning and reading before ready to put an engine into the latest of their gliders and make the first attempt at power-driven flight.

North American orchids depend for food upon a microscopic organism inside their roots which helps them take in food from the soil.

The United States imports more than 7,000 quill pens from England every year.

Britain Accepts Challenge

Race With Russia For Gold Output Has Started

For all of 1936 Soviet Russia is expected to produce about 6,000,000 ounces of gold. And because of its expansion program the Soviet Union is expected to be the world's largest gold producer by 1939. At present South Africa holds the title. British interests say that all of South Africa's mines are going full blast. They hope that by 1939 the gold producing title will be retained.

It is interesting to note that in 1928 the Soviet Union produced only \$99,000 ounces of the precious metal. Last year the full output was 5,650,000 ounces. According to informed mining interests the rich deposits of gold ore in Siberia are still virgin territory. The British have accepted the challenge. And so the race for gold output is on.

Not War Material

Governments Agree Arms Embargo Does Not Include Gas Masks

Gas masks do not come under the heading of "war material," it was decided in London by the international committee that is attempting to supervise non-intervention in the Spanish civil war. The committee had before it more than a dozen replies from governments, all agreeing that gas masks should not be prohibited under the various arms embargoes now in force. Consequently the exportation of gas masks becomes legal hereafter to either side in the civil war.

Lighthouse Guides Motorists

A lighthouse to guide motorists approaching Leipzig, Germany, has been erected. Set up on one of the main highways, it has glass walls illuminated at night so that directions and distances inscribed thereon may be read from afar. Illuminated indicators have been placed at other crossroads, commanding approaches to Leipzig.

It's easier to mortgage the home to buy a car than to mortgage the car to buy a home.

If You're Told to "Alkalize"

Try This Remarkable
"Phillips" Way
Thousands are Adopting

On every side today people are being urged to alkalize their stomach. And thus ease symptoms of "acid indigestion," nausea and stomach upsets.

To gain quick alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR — take two Phillips' Milk of Magnesia Tablets, which have the same antacid effect.

Relief comes almost at once — usually in a few minutes. Nausea, "gas" — fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Will Be Decided Soon

The question of whether the King will attend the coronation durbar at Delhi is likely to be settled soon, the Manchester Guardian said. If it is decided in the affirmative, December of next year, between the Indian provincial and federal elections, will be the probable date, the newspaper predicted.

Crochet Them Both...They're Easy

Crochet
These

PATTERN 5408

The right accessories say so much! And a hand-crocheted hat and purse will tell the world you're right in style. The perky hat, done in single crochet, is not only easy, but is grand to wear with a high-collared coat. In the matching purse, the centre panel introduces contrast by a different patterning of stitches. Shop soon for some colorful yarn, with which to crochet this set. In pattern 5408 you will find directions for making the set; material requirements; illustrations of the set and of all stitches needed.

To obtain this pattern, send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Seventy Varieties Of Maple

Sugar In Commercial Quantities
Only Obtained From One

There are over 70 varieties of maple trees in the world, but only one of the seventy yields sugar in commercial quantities. This is the famous hard or sugar maple which grows in Canada from the Atlantic Ocean to the Lake of the Woods and in the eastern United States. Its beautiful leaf is the national emblem of the Dominion. About 95 per cent. of the maple products' industry in Canada is at present confined to the St. Lawrence River valley.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER VII.—Continued

"What was there to do? I tossed a twenty-dollar bill to one of the attendants to see that he got into his car all right. Such caution was not worth soiling my hands over."

Pain tore at Starr's heart. His words were properly chosen, but there was something in his careless tone. What he really meant, it was quite plain to her, was that her honor was not worth soiling his hands over! A twenty-dollar bill was nothing. Money smoothed his play-boy path wherever he went. . . . An icy hand clutched at Starr's heart. For it was quite as plain to her that he expected his money to win her. In his own way, on his own terms.

Not for the world, though, would she have let him know she realized that. With a flash of her old bravado, she said flippantly:

"And what does that make me?" Lance's black eyebrows lifted slightly, and he smiled, with a touch of indulgence.

"I hope it makes me your cavalier for the evening, at least," he said, his voice low, almost a whisper. There was a wealth of meaning in his tone which lent his innocent words a deep significance.

Starr turned away from him with a wave of revulsion. Lance Marlowe was quick-eyed; he was trained to the nuances of feminine emotion. He saw his mistake instantly, and his face darkened.

"I should have known better than to use my usual line on you." There was a touch of insolence intoned. Then he shrugged. "I suppose you'll not be wanting to stay any longer—now—so at least I can see you to your car, get your wrap for you, or something?"

Starr cried out almost in a panic. "No—no! Nothing! And I have no intention of running away from—oh, any or you!"

But in spite of her defy, suddenly she was fleeing from him. Anywhere to get away. She had said she meant to stay, but all she really wanted to do was to get away forever from this mad, glittering playtime world. It was not in any way what she had expected it would be. Living out her span in drab obscurity was better—a million times—than this!

Half blinded with the tears she was forcing back as she dashed up the balcony steps, she collided with something that stopped her flight. The strong, vital body of a man. A second her face was buried against the front of a starched shirt; then she looked up, dazed.

"Starr! For Heaven's sake! Where do you think you're going? Out to beat some kind of a record?"

Michael's hands were gripping her shoulders. Michael's face beamed down at her. He was so full of his own satisfaction that he did not even notice her agitation. He could take things lightly like that, make humorous remarks, laugh! when her heart was breaking!

Again she was conscious of the overpowering attraction of his presence, like an intoxicant in her blood, that sent it singing along through every vein in her body. She fought against it desperately. Why must it be like this?

Michael was so pleased that he almost hugged her. Yet his pleasure was simply that of a man who has just put over a good business deal. It was all in the head, not the heart.

He grinned, standing off to look at her with his head cocked a little to one side.

"Pret-ty swell!" he commented. "You are marvelous, Starr—superb! Everything is going just as we planned; better than we planned. You'll be the talk of the town tomorrow!"

The casual cocksureness of the man! As long as his own end was served, what did he care the price a woman paid? But how could she know he was congratulating himself on his own perspicuity—and his luck!—at picking up a girl who hung out in La Luna and having her turn out like this, as if she had been used to

people of this kind all her life? Or perhaps it was her training for her 'racket' that helped?

Starr's resentment raged again. Conflicting strangely with her storming emotions. She clenched her fists until the scarlet nails dug into her palms. A cold, brittle voice came through her painted lips.

"I can't go through with it, Michael."

His jaw dropped, and he stared. "Can't go through with it?" he echoed unbelievably. "But why? What's the matter?" Has anything happened—

Suddenly it was he who was agitated. He saw his money-making scheme falling through because of the whim of a girl he should have known better than to have trusted in the first place. His hands tightened their grip on her shoulders, sending shooting sparks of fire through her soft flesh.

He said rapidly: "What's wrong, Starr? Haven't I done enough for you? Isn't the salary high enough? I'll raise it!"

Money! Was that all that men thought about? And this particular one probably thought she was trying to hold him up, now that he had confessed she was making good, better than he had hoped she would.

A deep, trembling sigh shook her whole body, only to be repressed. She realized only too well how hope-

less it was to try to explain, to try to make him understand what this night had done to her. She had too plain a memory of the one or two occasions when she tentatively had tried to make him understand that she was not the kind of girl one usually picked up in place like La Luna. He had not believed her. She had known that. All he had seen in her was a good little actress who could carry out his plans, and he was thanking his lucky stars that sometime or other she had known what was called "the better things of life."

She writhed before his taunt, searching face. Dusky lashes shadowed against her ivory cheeks, hiding her passion-filled eyes from him.

"Money!" she repeated dully. "That's not the reason. I've changed my mind, that's all!"

"All!" A long moment he paused. When he spoke again a harsh note had crept into his voice. A note of contempt.

"I didn't know you were a quitter, Starr."

Her vivid face flashed up to meet his gaze. What he said stung her more than all that had gone before.

"So that's what you think of me?" "What else do you expect me to think?" He shrugged, and a queer little quirk came around the corners of his mouth. "Or is it, perhaps, that Lance Marlowe has offered you a more attractive proposition? He would!"

She glared at him, breathless in her instantaneous raging fury. (To Be Continued)

Tribute To Boy Scouts

In the course of a tribute to the effectiveness of boy scout training during a discussion of juvenile delinquency at the world conference of Rotarians at Atlantic City, Dr. Amos O. Squires of Ossining, N.Y., stated that statistics showed only three out of every 30,000 criminals had ever been boy scouts. 2173

To Ease a Headache Fast

Get Real Quick-Acting,
Quick-Dissolving
"ASPIRIN"

See How
"ASPIRIN"
Tablets Work

In 2 seconds by stop watch, an "Aspirin" tablet starts to disintegrate and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For QUICK Relief

If you suffer from headaches what you want is quick relief.

"Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

● "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

LAYERBILT

EVEREADY
EXTRA DUTY
RADIO B BATTERY

LAYERBILT 'B' BATTERY

AIR CELL 'A' BATTERY

The quality of radio reception largely depends on your batteries. Ask for Eveready—and be sure!

IT IS AIR CELL that has made battery radio so immensely popular these days. Air Cell—the modern battery—does away with the necessity of re-charging.

Air Cell maintains itself by simply breathing air. It sounds like a miracle and it is indeed one of Science's great achievements. Best of all, peak power level is maintained for 1000 playing hours. No dwindling of power as in other batteries.

And Layerbilt! Well—everyone knows it is the super "B" battery. It is built in tightly-packed layers and gives far longer life than the old-fashioned round-cell types. Thus you don't have to change your "B" battery as often as formerly.

This year, Eveready has eliminated the terminal posts and given you one socket—this means only one connection for each "B" battery.

For perfect team work—Air Cell plus Layerbilt.

Look At It This Way !

A retail store regards itself as being a public servant. Therefore, it is wholly fitting that it should try to be the best and most eager servant possible. A retail store which hides itself from those whom it wants to employ it, becomes under employed, and so its sales decline.

The public inclines in largest numbers towards those stores which seek its attention and custom. It takes the advertising store at its own valuation. It likes to do business with those who manifest eagerness to serve it. It likes to buy at those stores which have to renew their stocks frequently.

Advertising is just communicating news and information about one's store and service. It is just a form of talking. It is those who are listened to. Silent stores lose out to stores which carry on conversation—in the form of newspaper advertisements—with those whose custom they want.

Any retailer who wants to get more customers—for the replacement of customers who become lost to him and for the expansion of his business—can surely get them by making his store important in their eyes, by putting in his advertisements the kind of information which will help buyers come to decisions.

The Pioneer advertising columns are the cheapest and most effective manner in which to get your message before the people you wish to cater to.

LOCAL & GENERAL

Mrs. K. Holfeld and two children of Calgary, are visitors at the home of Rev. and Mrs. R. Mensch.

St. Cyprian's W.A. Whist Drive at the J. D. Thomas home tomorrow (Friday) evening.

Art. Boorman who is attending business college in the southern city, is a visitor at his home here for the weekend.

W. G. Liesemer, A. R. Kendrick, Alf. Brusso and Len. Berscht motored to Calgary on Wednesday to take in the Calgary-Regina rugby game.

Buy Your Underclothing from T. E. Scott—and save money.

George Boorman of Bentley, accompanied by Messrs. Dave Kurzman and Sam Sambrooke, visited his parental home over weekend.

Misses Wynne Studer and Laura Buhr who are attending business college in Calgary, visited their respective homes here last weekend.

Reuben Rodney shipped a carload of cattle to Vancouver on Tuesday. They were shipped through W. W. Gillrie.

The I.O.D.E. are announcing their Annual Dance for Wednesday, November 25th. Keep the date open.

Children's Leather Lined Mitts? Yes, we have them from 50c up.—T. E. Scott.

Mr. Seto Joe, of the Club Lunch, left Tuesday for a six months' visit to his home in Canton, China. He sails Saturday on the "Empress of Japan" from Vancouver.

According to the Alberta Gazette David W. Bohannon has been granted a lease on the sodium sulphate rights on a piece of land in the Garfield district.

Auctioneer Boyce announces that he will hold a Community Auction Sale on Thursday, November 19th. List anything you have to sell with C. E. Reiber.

IT'S NONE TOO SOON—to be thinking of Christmas and a gift for old friends! They'll appreciate the thoughtfulness that prompts you to send your photograph. New style mounts in stock—J. SCRUTON'S Prices are Moderate!

Try a pair of our Pullover Mitts. We have them from 45 cents up. T. E. Scott.

The Didsbury School Orchestra took part in the Amateur Hour Concert at Carstairs last Friday evening and were awarded a prize. Jack Edwards also won 1st prize in the intermediate solo class and was complimented by the judges on his singing.

Among those who attended the Armistice Banquet of the 31st Battalion held in Calgary on Saturday evening were Bill Gillrie, Charlie Mardon, Pete Miquelon, Bill Loader and Frank Gooding. Bill Gillrie says they had ginger ale to drink—but not much.

A meeting of a number of young people interested in badminton was held Monday night to consider the possibility of organizing a Badminton Club. The expense of procuring a place suitable to play was the principal problem, but it was thought if thirty members could be obtained it would be possible to organize. Another meeting will be held in the near future.

For all lines of Men's Overshoes buy from T. E. Scott. We have them from \$1.40 up.

For Sale—Registered Shorthorn Bull, 3 years old. Bred by Frank Trick of Carstairs. Price \$50.00—Apply D. Williams, Didsbury

BIRTHS

at Didsbury General Hospital

November 5th to Mr. and Mrs. Emil Hehr a son, Earl Walter

November 5th to Mr. and Mrs. Andrew Peck a son, John Emory.

November 6th to Mr. and Mrs. David Schrader a son.

November 9th to Mr. and Mrs. Lloyd C. Stauffer a son, Ray Elmer.

Fire Destroys Farm Home.

Fire totally destroyed the farm home of C. A. Montgomery west of Elkton on Friday afternoon.

The fire started from an unknown origin shortly after dinner and spread so rapidly that the occupants had some difficulty getting out in time.

Mrs. Montgomery suffered from shock and was attended by Dr. Clarke.

The whole contents of the house, including clothing, were destroyed. There was no insurance.

RUGBY NOTES

The November meeting of the W.I. was held at the home of Mrs. Carlson, with an attendance of 22. After a short business session the monthly talk on the League of Nations was given by Mrs. H. Hosenood. Miss Marie Chambers gave a most interesting and enlightening discourse and demonstration on "Cosmetics." This was followed by a very entertaining account of a trip round the Great Lakes and a visit to the State Fair at Columbus, Ohio, given by Mrs. Parker. Two vocal solos by Mrs. P. Daniels brought a very pleasant afternoon to an end. Lunch was then served by the hostess. The December meeting will be held at the home of Mrs. August Krebs, and being the business meeting of the year a full attendance of members is asked for.

Westcott Notes.

The Westcott Social Credit Group met on Wednesday, November 4th at the home of Mrs. T. A. Murphy and spent a very enjoyable evening. Roland Webster and L. P. Worthington were chosen as delegates to attend the meeting in Didsbury on November 5th. The secretary treasurer who had procured fifteen Prosperity Certificates from Edmonton, sold them out to members in a few seconds. It was decided to raise funds and repeat this as quickly as possible. Five dollars were sent down to the Prophetic Bible Institute to help defray expenses of the Radio Sunday School. Musical selections were given by the Levagood Sisters, Roland Webster and Clifford Murphy. Our next meeting will be held at the home of Mrs. Miller, December 2nd, and a very cordial invitation is extended to all. Lunch was served by the hostess.
